

LedgerLok Guarantee

The coating on the new FastenMaster® LedgerLok™ Screw has been designed to protect against corrosion in all exterior applications, including the newer pressure treated chemicals – ACQ and Copper Azole.

As stated on our packaging, FastenMaster is so confident of the coating that we provide a guarantee on this fastener.

Under the terms of this guarantee, FastenMaster will replace any rusted fasteners and provide a fair means of remedy for the re-installation of effected fasteners for the life of the project.

This guarantee, however, does not cover the following “incorrect use” conditions:

- coating removed by means of improper installation
- salt water contact, defined as within 1 mile of salt water (use of stainless steel fasteners recommended in this case)
- failure due to improper application

For questions regarding the use of the LedgerLok screws, please contact the FastenMaster team at 1-800-518-3569 or email us at info@olyfast.com.

Note: This warranty pertains to pressure treating chemicals and treatment procedures that are currently on the market as of the printed date on this statement. If the chemicals and/or the pressure treatment procedures change, then this warranty may be subject to revision without notice.

This dated warrantee supercedes all written statements prior to February 20, 2004
